January 15<sup>th</sup>, 2019**Reporting requirement according to paragraph 33 of the 'REACH' regulation  
(EG No. 1907/2006)**

Dear Ladies and Gentlemen,

As you know we confirm with the CE-labelling and with the declaration of conformity of our medical devices that the respective products are in compliance with the "essential requirements" of the European Medical Device Directive (93/42/EWG) dated June 14<sup>th</sup>, 1993 and the German Act on Medical Devices.

Concerning the field of medicinal products we confirm that we comply to the requirements of Good Manufacturing Practice according to the Directive 2003/94/EG and the German Medicines Law.

This includes that our products are designed and manufactured in a way that when used under the conditions and for the purpose intended, they will not compromise the clinical condition or the safety of patients nor the safety and health of users or third parties if the products are used under the intended condition and purpose. Respective assessments are executed e. g. in combination with the implementation of the risk management system according to ISO 14971 for medical devices as well as ICH-Directive 9 for medicinal products.

Since adoption of the European Directive 'REACH' (Registration, Evaluation and Authorisation of Chemicals) we have to inform which devices include a substance named in the so called list of candidates in a concentration of more than 0.1 mass percentage. This list has been announced to public on the 'ECHA' website (European chemical Agency) on October 28th, 2008 and has been updated continuously.

**Chairman of Supervisory Board:**  
Prof. Dr. h.c. Ludwig Georg Braun**Executive Board:**

...

According to substances published in the list of candidates **DEHP** (Bis (2-ethyl (hexyl) phthalate), **DOTE** (2-ethylhexyl 10-ethyl-4,4-dioctyl-7-oxo-8-oxa-3,5-dithia-4-stannatetradecanoate) and **PZT** (Lead titanium zirconium oxide) are present in relevant concentrations in some of our products / medical devices.

The affected products from the divisions Hospital Care and OPM, the DEHP (CAS Number: 117-81-7) to more than 0.1 mass percentage mentioned are labeled as follows:

The identification is based on the following rules: Directives 67/548/EEC, 1999/45/EC and EC Regulation No. 1272/2008 (CLP Regulation) and the REACH Regulation (1907/2006).

Products containing DOTE (CAS Number: 15571-58-1) with more than 0.1 mass percentage are listed in the annex to this letter.

Furthermore, the air sensor installed in the Infusomat Space and Infusomat Compact Plus contains the substance PZT (CAS No. 12626-81-2) in relevant concentration.

With this information letter we comply with the obligation to provide information in compliance with article 33 § 1 of the REACH Regulation.

This letter will be actualized if a substance relevant to our products has been added to the list of candidates. Until then this letter retains its validity.

For further questions please do not hesitate to contact us.

Kind regards,

B. Braun Melsungen AG

ppa.

J. Heil  
Vice President Quality- and Environmental  
Management Hospital Care / OPM

  
Dr. M. Lugan

Member of the Board

Annex: List of DOTE-containing products / medical devices

Annex to the letter "Information obligation under Article 33 of the REACH Regulation (EC No. 1907/2006)"

**List of DOTE-containing products / medical devices:**

The following B. Braun Melsungen AG products contain more than 0.1% by weight of DOTE (2-ethylhexyl 10-ethyl-4,4-dioctyl-7-oxo-8-oxa-3,5-dithia-4-stannatetradecanoate, CAS Number: 15571-58-1):
